HEIFER INDEX

For sale order purposes, heifers were ranked by calculating an index utilizing each heifer's individual performance and current EPDs. With respect to EPDs, scores are calculated based upon the within breed EPD percentile rank for five traits with a maximum potential score of 60 points. Another 40 points are available based upon individual performance. Therefore, the maximum score of 100 would identify a heifer with the most genetic potential and a score of 50 would be considered average for the breed.

Because each producer has their own breeding objectives and priorities for selection, the index is broken down into three basic parts:

Performance EPDs—Cumulative EPD ranking for Direct Calving Ease, Weaning Weight, Milk, and Yearling Weight. Maximum = 40.

Carcass EPDs—Cumulative for \$Beef, CHB\$ or TI based on ultrasound measurements.
Maximum = 20.

Individual Performance—Cumulative ranking based on adjusted weaning and yearling ratios, muscle score, and REA/CWT. Maximum = 40.

Since EPDs are not available for commercial heifers, the maximum potential score is 60 points and is based upon individual adjusted weaning, yearling, ribeye area, and intramuscular fat ratios, muscle score, and REA/CWT.

2026 INDEX SCORING

EPD Percentile Rank	Muscle Score	WWR/YWR	REA/CWT	Points
0 – 10	1.4	≥ 110	≥ 1.21	10
11 – 30	1.3	105 – 109	1.15 – 1.20	8
31 – 50	1.2	100 – 104	1.10 – 1.14	6
51 – 70	1.1	95 – 99	1.05 – 1.09	4
71 – 85	1.0	90 – 94	1.00 – 1.04	2
